Chrysler's Leading Provider Of Fleet Mobility Conversions

No other van conversion manufacturer in America has as much experience serving special needs fleet service providers; from nursing homes and living centers to veter-

With its expansive floor, generous interior volume, and easily configurable design, the RAM ProMaster is ideally suited among its competition for passenger or mobility applications. The ProMaster offers a wide range of upgrades and options, with nearly limitless seating designs aided by our proprietary interactive configuration tool. Whether your need is for a low-cost, functional shuttle, a high-quality executive transport, or an easily adaptable mobility vehicle, the ProMaster gives you an economical, flexible, and dependable solution.

The RAM ProMaster, with its many best-in-class features, is built on the two most functional ProMaster models: The 2500 and 3500 extended. Both feature the high-roof option and 159-inch wheelbase, making them the most suitable platforms for passenger and mobility vehicles in the industry.

The Fastest Growing National Sales and Service Network

Our national network of customer service, sales, and maintenance centers grows larger by the day. Finding answers to questions, solutions to problems, and qualified, trained technicians to handle any service issue is as easy as taking a trip to our website to find the FR Conversions Spe-
